I am writing in regards to the attorney/ GALS that prey upon families in the Ct court system. I was an alienated parent and still am for years. I went to court since the parenting system was not working as agreed to. I hadn't seen my kids in months. Judge Malone appointed Julia Von Schilling as the GAL. She made promises she could not keep and charged us almost 10k for a parenting plan that could not be enforced by the courts. She stressed how important it was to get the plan signed before the children's 16th birthday when in fact, their 16th birthday made no difference. If she had said this from the start, I never would have continued. She "conveniently" wrote me a letter after all was said and done telling me that my children had "autonomy" and the courts could not make them do anything that we just signed. Nice to know "after" I spent 10k drawing up the agreement. She also spent hours upon hours working on getting my ex wife help with her money problems. Had nothing to do with me but she even forced me to pay for her counseling which is absurd.

This was the worst experience I ever had since being divorced. Attorney Von Schilling knew exactly what she was doing and knew that the courts had no say as to what my children could decide since they were brainwashed by my ex. The GAL system is broken and I truly believe the judges and GALS are in bed with each other. The system needs a complete overhaul.

Sincerely,

Ron Ventura
